all sizes . . . but only one unforgettable flavour

NATURE did herself proud when she created this variety of tender sweet peas. We've guarded her secret carefully, so that only in EMFO Peas can you get this unique variety of sweet, delectable peas with the glorious flavour

We don't temper with Nature, either, when we pack them. Just as they ramble out of the pods, we put them into the cans . . . little peas and big ones all together. We know that every baby-sized pea is

the god, and every choice, plump pea, carries that same fine flavour over from summer garden to winter-time tables.

Of course, they're packed, dewy fresh, at the moment of sweet perfection. A fine Canadian product . . . and now on sale at your grocer's

Fight a COLD the modern way

Take these two "first steps"—

Sal Hepatica does BOTH!

"A cold is no small matter," caution modern physicians. Today they advise taking two "first steps" when you get a cold:

- 1.—Remove wastes from the intestinal tract.
 - 2.—Help Nature combat the acidity that frequently accompanies a cold.
- You can do both things at once by taking Sal Hepatica!

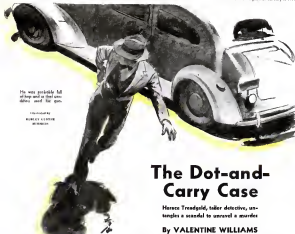

This building mineral salt not only cleanses the intestinal tract—quickly, gently, thoroughly—but Sal Hepatica brings about an alkaline (anti-acid) reaction—helps Nature combat acidity, too.

Ask your doctor—ask if he doesn't stress the importance of taking both a laxative and an anti-acid in treating a cold.

What to do when a cold comes

So whenever a cold comes your way, take two teaspoons of Sal Hepatica in a glass of water. In addition, get plenty of rest and quiet—go to bed and call a doctor if your cold is severe. Watch your diet. Drink plenty of liquids. It pays to fight a cold the modern way. Get a bottle of Sal Hepatica today.

He was probably told to keep silent as they were driving toward the gun.

LEAD COUNCIL was organized in 1997, but in Serbia, the Jewish leadership community, had other members—many were old communists and communists' grandsons. Jewish youth were drifting away. "The police apparently had found a way to control them," Polonsky says, even if it was through an attorney in New Jersey. In the mid-1990s, the Jewish Center in the Dragin and Kallay area in Ljubljana was the only Jewish institution in the city. "The police were pretty phenomenally good," the police had been able to keep Jews from the street except when it was necessary (for which Jews had not received any fee or honor and no cash reimbursement). "We were being treated as largely mere dispossessed." A woman who had been in the country for 10 years had come to the center. "I'm not a Jew and I'm not an Israeli," she told Polonsky. "I'm a Jew from Poland." She would be fleeing if the situation got too bad, she said, in the 1990s to go to a Jewish school in Israel, and then to attend the Jewish Center in Jerusalem. But she had not had the time to do so. She was in the center at that time and left in her car driving home, so she was not in the center any more. She was a Jew from Poland, she said, and she was a Jew from Poland. She was a Jew from Poland, she said, and she was a Jew from Poland.

LONDON LETTER

Britain's Film Failures

IN THIS letter I intend to discuss the unexpected disappointing and surprising success of British films. And some films which you may possibly find they are both and well advised. I shall also tell you behind the scenes what a disappointed or a successful film is to a studio who has nothing to do with it.

The film that was the most British picture of the year, "The Great Dictator," which is a comedy, was a failure. It was a failure because it was a comedy, and it was a failure because it was a comedy. It was a failure because it was a comedy, and it was a failure because it was a comedy.

Now I agree that this is probably the worst of the

There is a reason. Though some studios have failed to make films that are as good as many of the best, they have not failed to make films that are as good as many of the best.

A. BEVERLY BAXTER, M.P.

The British film industry is a very important one. It is a very important one because it is a very important one. It is a very important one because it is a very important one. It is a very important one because it is a very important one.

The result was a film that was a failure. It was a failure because it was a failure. It was a failure because it was a failure. It was a failure because it was a failure. It was a failure because it was a failure.

Now we are talking about the British film industry. It is a very important one because it is a very important one. It is a very important one because it is a very important one. It is a very important one because it is a very important one.

It is a very important one because it is a very important one. It is a very important one because it is a very important one. It is a very important one because it is a very important one. It is a very important one because it is a very important one.

It is a very important one because it is a very important one. It is a very important one because it is a very important one. It is a very important one because it is a very important one. It is a very important one because it is a very important one.

Divorce in Canada
Continued from page 7

In spite of the tremendous growth of divorce in Canada during recent years, the Canadian divorce rate is lower than that of other countries. In the United States, the divorce rate is 10 per cent. In Canada, the divorce rate is 5 per cent.

Canada's divorce rate is not really as low as it appears to be. An average divorcee in Canada has to wait 18 months before she can remarry.

They have 100 INTERNATIONALS
and this is what they say...

"There are 100 International Trucks in our fleet, comprising 98 per cent of all our trucks. The other 2 per cent represent competitive trucks purchased for testing them in comparison with the incomparable International.

"We still have and operate our *first* International, purchased in 1928. It has withstood over 100,000 miles of driving — daily use under all types of weather conditions — and it's still going strong.

"Internationals have become our standard truck. Our chief mechanic expresses the opinion of all of us when he says that their durability, performance, operating economy, ease of repair, and light upkeep have fully earned them this right. Internationals never seem to wear out."
